

VBA ORIGINE

Description:

VBA Origine is a material derived from the valorization of used badminton wheels. Mainly composed of goose or duck feathers, cork and acrylic resin, compo'plume VBA can be used in furniture, layout, realization of technical and appearance rooms.

This material is composed of more than 70% recycled material.

Standard plates are 1100x700mm. Standard thicknesses: 10, 15 and 20mm. They are smooth but let out some asperities of cork and feathers.

For your specific projects (size, color, thickness, against collage on other material, texture), please contact us.

Features:

Density: 1300 kg/m³

Tinted full mass (standard colors: white, black, yellow, red, blue, on request on request)

Fire resistance Binder M1.

Thermal conductivity: ~ 0.5 W/m.K-1

Acoustic damping in transmission: Between 15 and 30% depending on frequencies

Methods of implementation:

It can be worked with the same tools as wood for sawing, machining and drilling.

Standard or Custom Panel: Soft Molding or Embossed Molding
