

VBA EVOLUTION

Description:

compo'plume® VBA Evolution is a material derived from the valorization of used badminton wheels. Mainly composed of goose feathers, cork and acrylic resin, compo'plume VBA can be used in furnishing, arrangement, realization of technical parts and appearance.

This material is composed of more than 80% recycled material.

Standard plates are 1100x700mm. Standard thicknesses: 10, 15 and 20mm.

For your specific projects (size, color, thickness, against collage on other material, texture), please contact us.

Features:

Density: 1100 kg/m³

Fire resistance Binder M1.

Auxiliary products

Colourless varnish: Use SIMAB PG3001YO/5 varnish/ Bonding: MSP glue or methacrylate glue.

Custom colors possible.

Methods of implementation

compo'plume can be worked with the same tools as wood for sawing, machining and drilling

Standard or Custom Panel: Soft Molding or Embossed Molding
